宇宙惑星居住科学連合・若手の会の紹介と今後の展望

**Introduction and future prospects of the SUHPHS's  
Young Researcher Association**

群馬大学重粒子線医学研究センター, Gunma University Heavy Ion Medical Center

A Young Researcher Association was established for science union of human planetary habitation in space (SUHPHS) in May, 2017. I was selected as the first representative. We are expecting network construction and expansion of the young researcher who carried the next generation. About 20 researchers in various fields are belonging currently. In the same year, this association held a symposium under the joint auspices of Grant-in-Aid for Scientific Research on Innovative Area "Living in Space" in the 31st Annual Meeting of Japanese Society for Biological Sciences in Space (JSBSS). Until now, this association was holding a symposium with JSBSS cooperation every year. I want to talk about "introduction and future prospects of this association" in this symposium.
