

Preface

We planned to publish the Proceedings of 6th International Symposium on Physical Sciences in Space (ISPS-6) in April and July issues of International Journal of Microgravity Science and Application (IJMSA) in 2016 and asked the participants for their contributions. By the assignment of author(s), the manuscripts are categorized into original articles or reviews and peer-reviewed according to ordinary procedures of publication in IJMSA. This Part 3 (with Part 4 in coming January issue) follows Part 2 in the July issue. We would like to thank contributors for their time and effort in preparing manuscripts and members of International and Domestic Program Committees listed below for their kind help in the review processes by anonymous referees.

In the Index, the presentation numbers are also included to indicate the assignment in the program of ISPS-6: [date-(agency, plenary, field etc.)-number (K for keynotes), field-(GL for general posters, ST-for student posters)-number].
