

巻頭言 高品質タンパク質結晶生成宇宙実験立ち上げの思い出

白木 邦明
340101

編集責任者: 田仲広明, 高橋幸子

特集: 宇宙における高品質タンパク質結晶化技術の伝承と可能性

1) 宇宙における高品質タンパク質結晶化技術の伝承

(解説) 平成26年度採択地球観測技術等調査研究委託事業「高品質蛋白質結晶化技術の宇宙科学研究拠点形成」について: 宇宙科学研究拠点形成の取り組み

裏出良博
340102

(解説) 宇宙環境を利用したタンパク質結晶化実験の技術的背景

高橋 幸子・田仲 広明
340103

(解説) 構造解析向けタンパク質結晶化宇宙実験に必要な実験技術

伊中 浩治・高橋 幸子・田仲 広明
340104

2) 宇宙における高品質タンパク質結晶化実験により得られた成果と今後の可能性

(解説) 宇宙結晶からの高分解能X線結晶構造解析のための技術開発

東浦 彰史・中川 敦史
340105

(原著論文) [NiFe]ヒドロゲナーゼの中性子結晶解析に向けての良質大型単結晶の調製

西川 幸志・樋口 芳樹
340106

(解説) 宇宙における高品質タンパク質結晶化技術の伝承と可能性

吉田 尚史・朴 三用
340107

(解説) 水素原子の可視化を目指したセルラーゼの大型結晶作製

立岡 美夏子・中村 彰彦・石田 卓也・高橋 幸子・巖 斌
田仲 広明・古林 直樹・伊中 浩治・五十嵐 圭日子・鮫島 正浩
340108

(解説) 実用的オリゴ糖合成の可能性を秘めた糖質関連酵素の立体構造

伏信 進矢
340109

編集責任者: 石川 毅彦, 永井 秀明

特集: GHFを用いた半導体結晶育成

(解説) Alloy Semiconductor実験総括

稲富 裕光・早川 泰弘・岡野 泰則・石川 毅彦
340110

(解説) Effects of Gravity and Crystal Orientation on the Growth of InGaSb Ternary Alloy Semiconductors - Experiments at the International Space Station and on Earth-

Y. HAYAKAWA, V. N. KUMAR, M. ARIVANANDHAN, G. RAJESH, T. KOYAMA,
Y. MOMOSE, K. SAKATA, T. OZAWA, Y. OKANO and Y. INATOMI
340111

(解説) 国際宇宙ステーションを利用した均一組成SiGe結晶の育成 (1) Hicariプロジェクト総括
荒井 康智・木下 恭一・稲富 裕光・塚田 隆夫
340112

(解説) 国際宇宙ステーションを利用した均一組成SiGe結晶の育成
(2) Traveling Liquidus Zone (TLZ)法による育成実験と微小重力効果
木下 恭一・荒井 康智・稲富 裕光・塚田 隆夫
340113

特集: Proceedings of 6th International Symposium on Physical Sciences in Space (ISPS-6) Part 4
September 14-18, 2015 at Doshisha University, Kyoto, Japan

編集責任者: 石川 毅彦, 東辻 浩夫

Part 4 concludes Proceedings of ISPS-6: Parts 1, 2, and 3 have been published in Vol. 33, Nos. 2, 3, and 4, respectively. We thank all the contributors for submitting their manuscripts and members of Program Committees listed in previous Parts for their help in peer-reviewing.

16So-2 Towards Controlling of Surfactant Foam Production in Space (Original Paper)
M. FAQIRYAR, Y. MASUMOTO, K. URUSHIBARA, A. YAMADA, A. ISE and Y. MORI
340114

17Cr-1K The Critical Growth Rate for Particle Incorporation during the Directional Solidification of
Solar Silicon under Microgravity (Original Paper)
T. SORGENFREI, T. JAUSS, A. CRÖLL, C. REIMANN, J. FRIEDRICH and M. VOLZ
340115

17Cr-4 Growth and Characterization of Doped Ge Crystals under μ g and 1 G to Investigate the
Influence of Different Convection Types (Original Paper)
T. SORGENFREI, A. HESS, J. ZÄHRINGER, A. DANILEWSKY, A. CRÖLL, A. EGOROV and
A. SENCHENKOV
340116

18Cr-6 Do We Need Microgravity to Improve the Diffraction Properties of Protein Crystals? (Review)
K. TSUKAMOTO, H. KOIZUMI, M. MARUYAMA, H. MIURA, Y. SUZUKI, H. TANAKA,
A. ES VAN DRIESSCHE and D. MAES
340117

CONTENTS

Preface The History of High Quality Protein Crystal Growth Experiment on board the International Space Station

K. SHIRAKI
340101

Editors : H. TANAKA, S. TAKAHASHI

Special Articles: Technology Transfer and Future Aspects of High-Quality Protein Crystallization in Microgravity

1) Technology Transfer of High-Quality Protein Crystallization in Microgravity

(Review) Research Base Initiative of Space Science of High Quality Protein Crystallization Technology Project

Y. URADE
340102

(Review) Background of Protein Crystallization Technologies in Space

S. TAKAHASHI and H. TANAKA
340103

(Review) Essential Techniques for Growing High-Quality Protein Crystals for Structural Analysis in Microgravity

K. INAKA, S. TAKAHASHI and H. TANAKA
340104

2) Outcomes and Future Aspects of High-Quality Protein Crystallization in Microgravity

(Review) Technical Improvements for High-resolution X-ray Crystallography from Space Grown Crystals

A. HIGASHIURA and A. NAKAGAWA
340105

(Original Paper) Preparation of the Crystals of [NiFe] Hydrogenase Suitable for the Neutron Structure

K. NISHIKAWA and Y. HIGUCHI
340106

(Review) Structure Basis for a Subunit Interaction of Influenza Virus RNA Polymerase for Drug Design

H. YOSHIDA and S.Y. PARK
340107

(Review) Production of Large-volume Cellulase Crystals for Visualization of Hydrogen Atoms

M. TACHIOKA, A. NAKAMURA, T. ISHIDA, S. TAKAHASHI, B. YAN, H. TANAKA,
N. FURUBAYASHI, K. INAKA, K. IGARASHI and M. SAMEJIMA
340108

(Review) Crystal Structures of Carbohydrate-active Enzymes with Potential for Practical Oligosaccharide Synthesis

S. FUSHINOBU
340109

Editors : T. ISHIKAWA, H. NAGAI

Special Articles: Semiconductor crystal growth by GHF

(Review) Summary of Alloy Semiconductor Experiment

Y. INATOMI, Y. HAYAKAWA, Y. OKANO and T. ISHIKAWA
340110

(Review) Effects of Gravity and Crystal Orientation on the Growth of InGaSb Ternary Alloy Semiconductors - Experiments at the International Space Station and on Earth-

Y. HAYAKAWA, V. N. KUMAR, M. ARIVANANDHAN, G. RAJESH, T. KOYAMA,
Y. MOMOSE, K. SAKATA, T. OZAWA, Y. OKANO and Y. INATOMI
340111

- (Review) Compositionally Uniform SiGe Crystal Growth aboard the International Space Station
(1) Hicari project summary
Y. ARAI, K. KINOSHITA, Y. INATOMI and T. TSUKADA
340112
- (Review) Compositionally Uniform SiGe Crystal Growth aboard the International Space Station
(2) Growth Experiments by the TLZ Method and Microgravity Effects
K. KINOSHITA, Y. ARAI, Y. INATOMI and T. TSUKADA
340113

Editors : T. ISHIKAWA, H. TOTSUJI

Editorial Committee

T. Ishikawa (JAXA), Editor in Chief

S. Adachi (JAXA)	S. Ozawa (Chiba Institute of Technology)
R. Imai (Muroran Institute of Technology)	S. Suzuki (Waseda University)
O. Imamura (Nihon University)	H. Tanaka (Confocal Science Inc.)
K. Kogure (JSF)	I. Ueno (Tokyo University of Science)
K. Kuribayashi (Shibaura Institute of Technology)	K. Usuku (JAXA)
H. Nagai (AIST)	I. Yoshizaki (JAXA)
M. Ohnishi (JAXA)	M. Watanabe (Gakushuin University)
H. Kuhlmann (TUW, Austria)	V. Molotkov (JIHT, Russia)
P.-F. Paradis (INO, Canada)	H. Thomas (DLR, Germany)

The journal is published quarterly by The Japan Society of Microgravity Application (M. Ishikawa, President).
